

A new website for St. George's premier golf cart destination.

Your inventory is luxury. Your website isn't (yet).

LVL Carts sells \$10K – \$13K vehicles with curated finishes, custom builds, and white-glove delivery — but the current site reads like a generic dealer page running on a stock template. The shopping experience and the showroom experience don't match.

WHY IT MATTERS

Conversion rate on luxury e-com sites is 3–5× generic templates. Buyers researching \$13K carts don't comparison-shop on price — they comparison-shop on trust signals: photography, story, polish.

Four moves. One brand.

A complete digital flagship — designed for the way you actually sell.

01

Redesign

Premium black + gold aesthetic that mirrors your showroom. Built on the Stitch "Desert Highline" design system.

02

Rides Rental Sync

Keep your existing inventory backend. Pipe live cart data into the new site via Rides Rental's platform integrations.

03

AI Concierge

An always-on chatbot that answers inventory, financing, delivery, and scheduling questions — and books test drives.

04

SEO & Local

Schema markup, local-business signals, fast page speed, and content built for "St. George golf carts" searches.

From template to flagship.

CURRENT

- Generic Rides Rental template
- Lorem-ipsum testimonials still live
- "Venom EV" still in meta tags (rebranded to Royal EV)
- Stock orange/black palette — same as 1,000 other dealers
- No financing flow on-site
- No chatbot — every question = a phone call
- Thin SEO. No schema. No local pages.

PROPOSED

- Desert Highline aesthetic — black, gold, tan
- Real testimonials from Southern Utah customers
- Brand-consistent across every touchpoint
- Editorial photography, big serif headlines, sharp UI
- Inline financing form — get your out-the-door price
- AI assistant: inventory, financing, delivery, scheduling
- AutoDealer schema + LocalBusiness markup + city pages

Your real inventory. New frame.

Below: actual product photos from your current site, dropped into the new design language. Week 3 includes a full retouching pass — clean backgrounds, color consistency, editorial cropping.

ATLAS · 4-PASS · LIFTED \$12,990

ATLAS · TIFFANY BLUE \$12,990

ROYAL EV · CROWN 4 \$9,990

Keep your backend. Replace the front-end.

You already use Rides Rental Software for inventory, leads, and billing. We don't replace that. We replace the customer-facing site — and pipe the data through.

INTEGRATIONS RIDES RENTAL ALREADY SUPPORTS

Stripe · Authorize.net · PayPal · Lightspeed · Dealertrack DMS · Google Analytics · Zapier · YouTube

An assistant that knows your inventory cold.

Available 24/7. Trained on your products, pricing, financing, delivery, and hours.

Inventory

Lists what's on the floor, by brand, by passenger count, by color. Pulls live from Rides Rental.

Education

Atlas vs Royal EV, lithium vs lead-acid, range, charging, LSV street-legal package, warranty.

Logistics

Delivery zones, financing pre-qual, scheduling test drives, hours, address — and books appointments.

EXPECTED IMPACT

+30% lead capture · -40% phone-tag · 100% off-hours coverage

Own "St. George golf carts."

Most local dealers don't bother with structured SEO. We'll fix that in week one.

Schema.org markup

AutoDealer + LocalBusiness JSON-LD on every page so Google reads inventory, hours, address.

Local landing pages

/golf-carts-st-george, /golf-carts-washington-ut, /golf-carts-hurricane — each ranking for its own city.

Content engine

Quarterly long-form posts ("Atlas vs Club Car", "Best golf carts for desert terrain") to capture top-of-funnel.

Meta + OG tags

Per-page titles, meta descriptions, Open Graph, Twitter cards. Already sloppy on the live site.

Page speed

Single-file build, lazy-loaded images, Tailwind CDN. Lighthouse 95+ on every page.

Google Business sync

Hours, photos, posts, reviews — kept in lockstep with the site so Google trusts you.

Live in 4 weeks.

WEEK 1

Discovery + Brand Lock

Confirm voice. Photo audit. Real-customer outreach for testimonials. Final brand colors.

WEEK 2

Build Phase

Site build complete. Rides Rental sync wired. Chatbot trained on knowledge base.

WEEK 3

Content + SEO

Local landing pages. Schema. Meta. Photo retouching. GBP optimization.

WEEK 4

Launch + Handoff

QA across devices. DNS cutover. Analytics + Search Console set up. Owner training.

Everything you need. Nothing you don't.

- ✓ New website — 6+ pages, fully responsive, premium design system
- ✓ Rides Rental data sync (live inventory + lead capture)
- ✓ AI chatbot trained on your inventory, financing, delivery, hours
- ✓ On-page SEO: schema, meta, alt text, local landing pages
- ✓ Editorial photography retouching pass on existing inventory shots
- ✓ Google Business Profile optimization + review-flow setup
- ✓ Analytics + Search Console + heatmap install
- ✓ 30 days post-launch support — bug fixes, content tweaks, training
- ✓ Source files (HTML, CSS, JS, image library) — you own everything

Our ask is unusual.

We believe in this build. We want skin in the game — and we'd rather drive your product than send an invoice.

THE OFFER

Full digital flagship build, traded for one Royal EV Crown 4 (\$9,990 retail).

WHAT WE PROVIDE

Site · Chatbot · SEO · Rides Rental sync · 30 days support

WHAT YOU PROVIDE

One Royal EV Crown 4 + a testimonial if you love the work

Let's build it.

If the offer makes sense, we can kick off discovery this week and have a live demo URL in your inbox in 7 days.
